

The Global Goals, or **Sustainable Development Goals**, are a universal call to action to overcome the most pressing challenges facing our world. It is a historic commitment that covers issues that affect us all, no matter where we live. Most importantly, the Global Goals involve all of us to build a more sustainable, safer and more prosperous planet.

Sustainability Development Goals Theme Calendar 2018

see beyond technologies have been associated with the Sustainability Industry since inception and we **welcome 2018 with Sustainability Development Goals as the calendar theme.**

This calendar attempts to showcase the various Development Goals towards Sustainability that has been described in terms of the three spheres or pillars, namely environment, economy and society.

Wish you a very Happy and Prosperous New Year 2018.

January 2018

infraSECURE

Affordable and Clean Energy : Ensure access to affordable, reliable, sustainable and modern energy for all. Promote broader energy access and increase use of renewable energy, including through enhanced international cooperation, expanding infrastructure and upgrading technology to provide clean energy.

Decent Work and Economic Growth: Promote inclusive and sustainable economic growth, employment and decent work for all. Roughly half the world’s population still lives on the equivalent of about US\$2 a day. A continued lack of decent work opportunities, insufficient investments and under-consumption lead to an erosion of the basic social contract underlying democratic societies that all must share in progress.

February 2018						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17

Quality Education: Achieving inclusive and quality education for all reaffirms the belief that education is one of the most powerful and proven vehicles for sustainable development. This goal ensures that all girls and boys complete free primary and secondary schooling by 2030. It also aims to provide equal access to affordable vocational training, to eliminate gender and wealth disparities and achieve universal access to quality higher education.

Good Health and Well Being: Ensure healthy lives and promote well-being for all by improving reproductive, maternal and child health; ending the epidemics of major communicable diseases; reducing non-communicable and environmental diseases; achieving universal health coverage and ensuring access to safe, affordable and effective medicines and vaccines for all.

April 2018						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30					

1st April – Fossil Fuel Day
7th April – World Health Day
22nd April – Earth Day

infraSECURE has modules to help in Hardware and Software Inventory, Asset Management, Desktop Management, Software Optimization, Compliance and Accounting, Audit-Trails, e-Attendance and Service Desk.

27	28	29	30	31		

STREAM helps you with Project Management, Automated Time sheets, Software Metering, Measurement and Analysis helping organizations derive productivity patterns and help build Business Intelligence.

Responsible Consumption and Production: Achieving economic growth and sustainable development requires that we urgently reduce our ecological footprint by changing the way we produce and consume goods and resources. The efficient management of our shared natural resources and the way we dispose of toxic waste and pollutants are important targets to achieve this goal.

Sustainable Cities and Communities: Sustainable development cannot be achieved without significantly transforming the way we build and manage our urban spaces with access to safe and affordable housing and upgrading slum settlements. It involves investment in public transport, creating green public spaces and improving urban planning and management in a way that is both participatory and inclusive.

June 2018						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
					1	2
3	4	5	6	7	8	9

11th July – Population Day

*Don't worry about costly IT Audits. Reports from **infraSECURE** can help you get prepared for Audits instantly. With the alerting and incident reporting system built into **infraSECURE** you could focus on the most important functions of supporting the core business.*

Climate Action: Greenhouse gas emissions continue to rise, and are now more than 50 percent higher than their 1990 level. Further, global warming is causing long-lasting changes to our climate system, which threatens irreversible consequences if we do not take action now.

Reduced Inequality: Inequality still persists and large disparities remain in access to health and education services and other assets globally. There is growing consensus that economic growth is not sufficient to reduce poverty if it is not inclusive and if it does not involve the three dimensions of sustainable development – economic, social and environmental.

August 2018						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
			1	2	3	4
5	6	7	8	9	10	11
12	13	14	15	16	17	18

NUCLEUS

Life Below Water: The world's oceans – their temperature, chemistry, currents and life – drive global systems that make the Earth habitable for humankind. Marine pollution, an overwhelming majority of which comes from land-based sources, is reaching alarming levels, with an average of 13,000 pieces of plastic litter found on every square kilometre of ocean. Enhancing conservation and the sustainable use of ocean-based resources through international law will also help mitigate some of the challenges facing our oceans.

Life on Land: Human life depends on the earth as much as the ocean for our sustenance and livelihoods. Plant life provides 80 percent of our human diet and we rely on agriculture as an important economic resource and means of development. Forests account for 30 percent of the Earth’s surface, providing vital habitats for millions of species and important sources for clean air and water as well as being crucial for combating climate change.

October 2018						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	31			

- 1st October – Habitat Day
- 10th October – Natural Disaster Reduction Day
- 16th October – World Food Day
- 17th October – International Day for Eradication of Poverty

STREAM helps you Identify total time used by various applications, Analyze total time spent on computers/projects
Optimize license utilization and re-deploy if required!

25	26	27	28	29	30	

*Our IOT Solutions **GREEN Money** and **GREEN Stat** Optimize Energy drain from Automated Teller Machines, Bank Branches by controlling the Air conditioners based on ambient temperature.*

Industry, Innovation and Infrastructure: Build resilient infrastructure, promote sustainable industrialization and foster innovation. Promote sustained inclusive sustainable economic growth, productive employment and decent work for all. Investment in infrastructure and innovation are crucial drivers of economic growth and development. Technological progress is also key to finding lasting solutions to both economic and environmental challenges, such as providing new jobs and promoting energy efficiency.

Partnerships to Achieve the Goal: Revitalize the global partnership for sustainable development. A successful sustainable development agenda requires partnerships between governments, private sector and civil society. Partnerships built upon principles and values, a shared vision, and shared goals that place people and the planet at the centre, are needed at the global, regional, national and local level.

December 2018
